EDUCATION

University of Central Florida

Orlando, FL

Bachelor of Engineering, Computer Science — Expected May 2027

GPA: 4.0 | Dean's List 2023

- Coursework: Data Structures & Algorithms, Discrete Structures, Systems Software, OOP (Java), Computer Organization

University of Central Florida

Orlando, FL

Full Stack Coding Bootcamp Certificate

September 2023

- 240 contact hours — MERN Stack, REST APIs, GraphQL, SQL/NoSQL, Agile Development

PROJECTS

VGC Champions Vault — Three data pipelines. One 90-second window.

GitHub | Live

React, TypeScript, tesseract.js, k-means, GitHub Actions, Capacitor

- Built a competitive HUD for Pokémon Champions: a screenshot of the opponent's team preview is run through OCR (tesseract.js) and turned into a live threat matrix with real damage math — inside the game's 90-second prep window.
- Engineered three self-updating data pipelines via GitHub Actions (daily usage stats, monthly ladder data, weekly tournament sheets) feeding spread distributions, checks-and-counters evidence, and k-means archetype clustering over 6,900+ real tournament teams; one codebase ships as an installable PWA and a CI-built Android APK.

Federated Analytics API — One query. Two worlds.

GitHub | Live

FastAPI, Presto, Cassandra, Iceberg (IBM watsonx.data), OpenAPI

- Shipped a six-endpoint analytics API against a live enterprise IBM watsonx.data cluster, using federated Presto SQL to join hot operational data in Cassandra with cold historical archives in Iceberg — in a single query.
- Drove the build spec-first (requirements and design docs to code) via AI-agent pair programming, backed by OpenAPI contract tests and custom Presto/Cassandra clients handling bearer-token auth over TLS.

PrepHub — Offline-first earthquake preparedness for Venezuela.

GitHub | Live

React, TypeScript, Vite, Workbox, Dexie/IndexedDB, Web Share API

- Rebuilt a Spanish-first preparedness PWA from scratch after the June 2026 twin earthquakes: a family builds its 72-hour kit and reunification plan in one 20-minute session, then keeps it forever with no internet.
- Achieved full offline durability with service-worker precache (Workbox) and IndexedDB, plus WhatsApp/print/QR sharing and a black-screen emergency mode — no backend, no accounts, and a ~120 KB first load targeting old low-end Androids.

WORK EXPERIENCE

Verizon Wireless

Orlando, FL

Sales Engineer

May 2025 – Present

- Educates teams on the newest technology releases, leading customer calls to demo devices and troubleshoot technical issues in real time across a 24-store regional footprint.
- Resolves integration and billing discrepancies by interpreting system error logs and leveraging internal APIs, bridging operations and technical support teams.

Verizon Wireless

Orlando, FL

Business Account Manager

Nov 2023 – May 2025

- Acted as a trusted technical advisor to SMB enterprise clients — uncovering requirements, designing tailored solutions, and driving adoption across organizations with multiple stakeholders.
- Built a logic-based Excel automation engine handling complex multi-condition pricing workflows, reducing deal turnaround time by 80%.

Wazuh, Inc.

Orlando, FL

Front End Developer Intern

Jun 2023 – Sep 2023

- Built and maintained React/JavaScript components for a cybersecurity dashboard serving thousands of enterprise users, integrating OpenSearch data visualizations.
- Translated complex backend security data into interactive visualizations, working cross-functionally with engineering and product teams in agile sprints.
- Managed iterative deployments via CI/CD pipelines and conducted code reviews to ensure software quality.

SKILLS

Programming: TypeScript, JavaScript (React, React Native, Node.js), Python (FastAPI, Django), Java, C, C++

AI & Agents: Claude Code / Claude Agent SDK (agentic & spec-driven development, MCP, subagents), Gemini API (prompt engineering, system instructions, structured JSON output), OCR (tesseract.js), k-means clustering

APIs & Backend: REST APIs, GraphQL, OpenAPI contract testing, Presto, third-party APIs (Ticketmaster, Gemini), TLS/bearer-token auth

Data: SQL (PostgreSQL, MySQL, Presto), Cassandra, Iceberg, MongoDB, IndexedDB (Dexie), IBM watsonx.data, automated ETL pipelines

Web & Infra: Next.js, Vite, PWA / service workers (Workbox), Capacitor, GitHub Actions, CI/CD, Docker, Vercel, Agile/Scrum

Languages: Spanish (Fluent), English (Fluent), Portuguese (Intermediate)
