EXPERIENCE

Verizon Wireless

Orlando, FL

Sales Engineer

June 2025 – Present

- Exceed quota every month at 130%+ while turning around underperforming locations, moving stores sitting below 20% of SMB goal to 100% of target.
- Demo Verizon One Talk, a cloud-based business phone platform, end to end for buyers, then troubleshoot it post-sale, resolving 15–25 platform and integration issues weekly by reading system error logs and querying internal APIs.
- Serve as technical point of contact for 15 reps and 3 directors across a 24-store region, running roughly 10 product demonstrations and enablement sessions per week.

Business Account Manager

November 2023 – June 2025

- Led the team in monthly software sales of Verizon One Talk at a 70% attach rate against a 40-unit goal, consistently closing 50 to 75 per month.
- Achieved 150% of quota for six consecutive months, reaching the top incentive tier multiple times, while sustaining a consistent 5 out of 5 customer experience score.
- Managed a portfolio of 100+ SMB accounts in Salesforce and Outreach, and built a logic-based Excel automation engine handling multi-condition pricing workflows that cut deal turnaround time by 80%.

Wazuh, Inc.

Orlando, FL

Front End Developer Intern

June 2023 – September 2023

- Built and shipped HTML/JavaScript pages through to public launch at an open-source cybersecurity company, and served as the bilingual bridge translating product internals between engineering and sales in English and Spanish.

TECHNICAL PROJECTS

Federated Analytics API

GitHub | Live

FastAPI, Python, REST, Presto SQL, Cassandra, Iceberg (IBM watsonx.data), OpenAPI

- Built a 6-endpoint Python API against a live enterprise data cluster, using federated Presto SQL to join two data stores in single queries, with bearer-token authentication over TLS and OpenAPI contract tests validating every endpoint.

VGC Champions Vault

GitHub | Live

Figma, React, TypeScript, tesseract.js, k-means, Capacitor, GitHub Actions

- Built 3 self-updating data pipelines on GitHub Actions that crawl, store, and filter public sources, clustering 6,900+ records with k-means and surfacing results through a live decision matrix rendered from a screenshot in under 90 seconds via client-side OCR.

PrepHub

GitHub | Live

Figma, React, TypeScript, Vite, Workbox, Dexie/IndexedDB

- Designed and built a Spanish-first, offline-first PWA holding a ~120 KB first load for low-end Android devices, with a service-worker precache and IndexedDB persistence.

EDUCATION

University of Central Florida

Orlando, FL

B.S. Computer Science, Expected December 2028

University of Central Florida

Orlando, FL

Full Stack Coding Bootcamp Certificate, 240 contact hours

September 2023

SKILLS & TECHNOLOGIES

Sales: Consultative and SaaS sales, portfolio management at volume, upsell and product adoption, product demonstrations, quota attainment, Salesforce (daily user), Outreach

Technical: Python, TypeScript, JavaScript, SQL, Java, C, C++; React, Next.js, FastAPI, Node.js; PostgreSQL, MySQL, Presto, Cassandra, MongoDB; Git, Docker, CI/CD, Figma

AI & Agents: Claude Code / Claude Agent SDK (agentic and spec-driven development, MCP, subagents), Gemini API (prompt engineering, structured JSON output), k-means, OCR

Spoken: Spanish (fluent), English (fluent), Portuguese (intermediate)
